RC70

EnvisionTEC's RC70 is a high temperature resistant resin for building tough and stiff parts at very high resolutions. RC70 is a nanoparticle-filled material that is used to build hard-wearing, stiff and high temperature-resistant parts that are ideal for silicone molding. They have an opaque peach color appearance. RC70 is ideal for applications requiring superior stiffness and high heat deflection temperature, such as pump housings, blades, test parts for wind tunnels, light reflectors and various automotive applications.
